Easy
Step-by-Step
Instructions

Designing a cat is very easy. There are so many different colors and types of cats to choose from. This kit provides several colors to design various cats.

Step 1 – Start with clean skin.

Step 2 – Choose a base color and apply with a sponge. Avoid areas that will be used for the second color. Lightly apply Mehron's Colorset Powder with the powder puff and then dust off the excess.

Step 3 – Choose a second color and apply in the areas around the face. Try to keep the edges uneven so it will look like hair. Lightly apply Mehron's Colorset Powder to set the new color, and then dust off the excess.

Step 4 – Some cats may require additional colors for added accents apply them now and then powder them as in Step 2 & 3. Be sure to leave the area around the mouth uncovered.

Step 5 – For added interest, use the white around the mouth and powder it also with the Colorset Powder.

Step 6 – To complete the look use the pencil liner or brush to add small details to outline the eyes and draw in the mouth. A few dots on the upper lip will give the look of whiskers or use the Whiskers included in this kit. Remember, every cat is different, so make it your own. Have fun.
